

# Activate Microsoft Azure with Azure Application Insights

## Conditions and Terms of Use

Microsoft Confidential

This training package is proprietary and confidential, and is intended only for uses described in the training materials. Content and software is provided to you under a Non-Disclosure Agreement and cannot be distributed. Copying or disclosing all or any portion of the content and/or software included in such packages is strictly prohibited.

The contents of this package are for informational and training purposes only and are provided "as is" without warranty of any kind, whether express or implied, including but not limited to the implied warranties of merchantability, fitness for a particular purpose, and non-infringement.

Training package content, including URLs and other Internet website references, is subject to change without notice. Because Microsoft must respond to changing market conditions, the content should not be interpreted to be a commitment on the part of Microsoft, and Microsoft cannot guarantee the accuracy of any information presented after the date of publication. Unless otherwise noted, the companies, organizations, products, domain names, e-mail addresses, logos, people, places, and events depicted herein are fictitious, and no association with any real company, organization, product, domain name, e-mail address, logo, person, place, or event is intended or should be inferred.

# Module Overview

# Agenda

- The Basics
- Azure Capabilities
- DevOps

## Module Overview

### Section 1: Monitoring and diagnostics in Cloud Hosted App

#### Lesson: The Basics

# IT Continuum

Physical

Virtual

IaaS

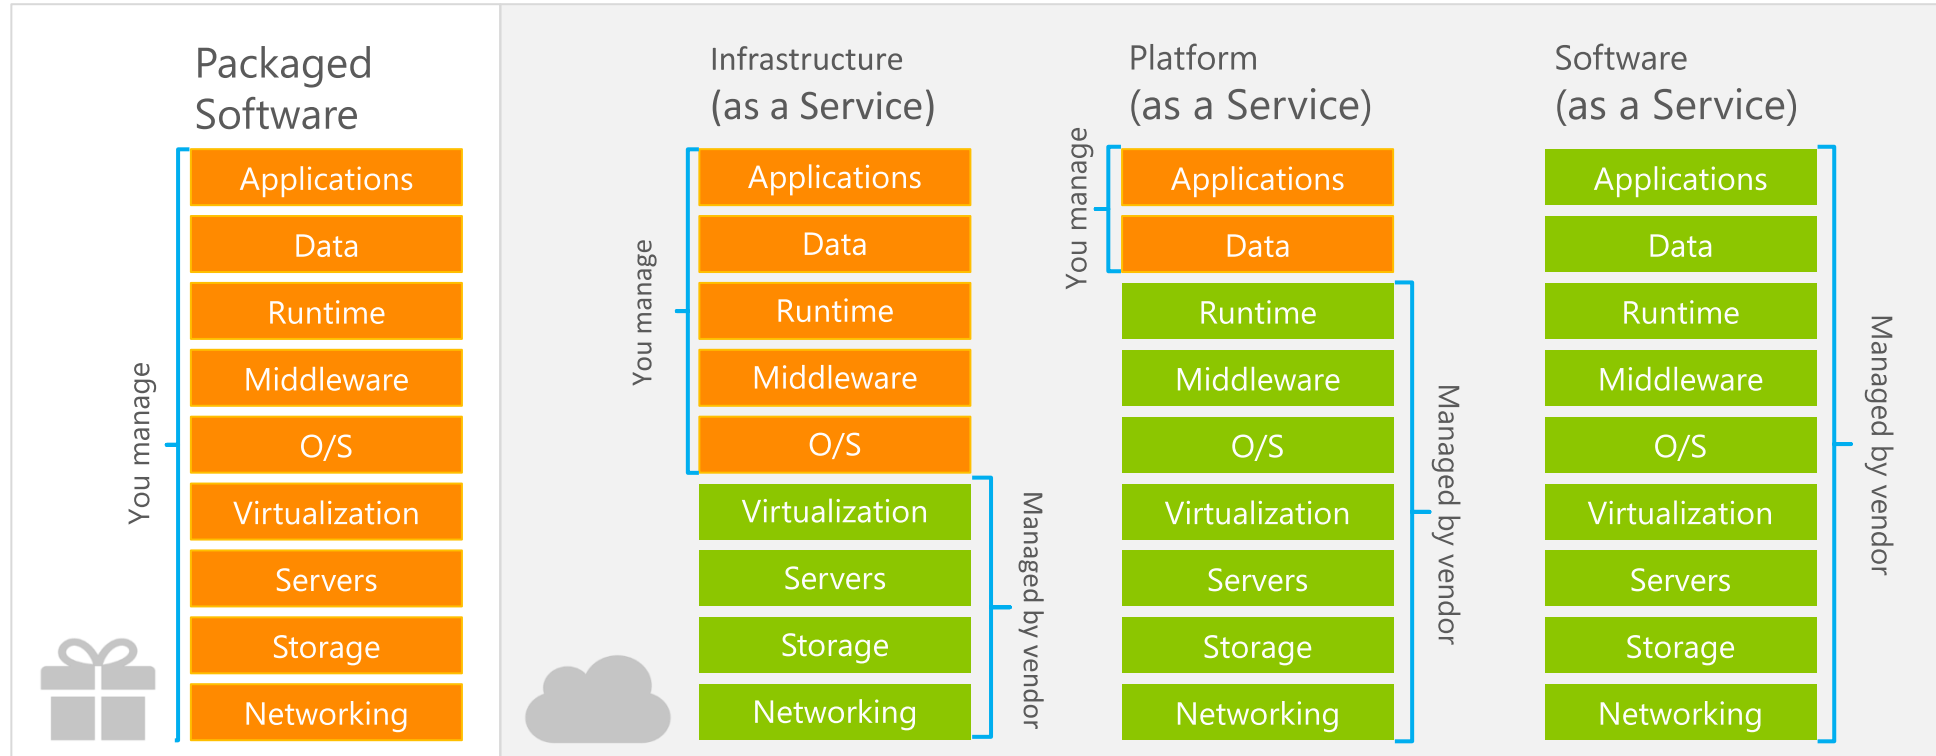

PaaS

SaaS

# Cloud Computing

# What does monitoring mean to you?

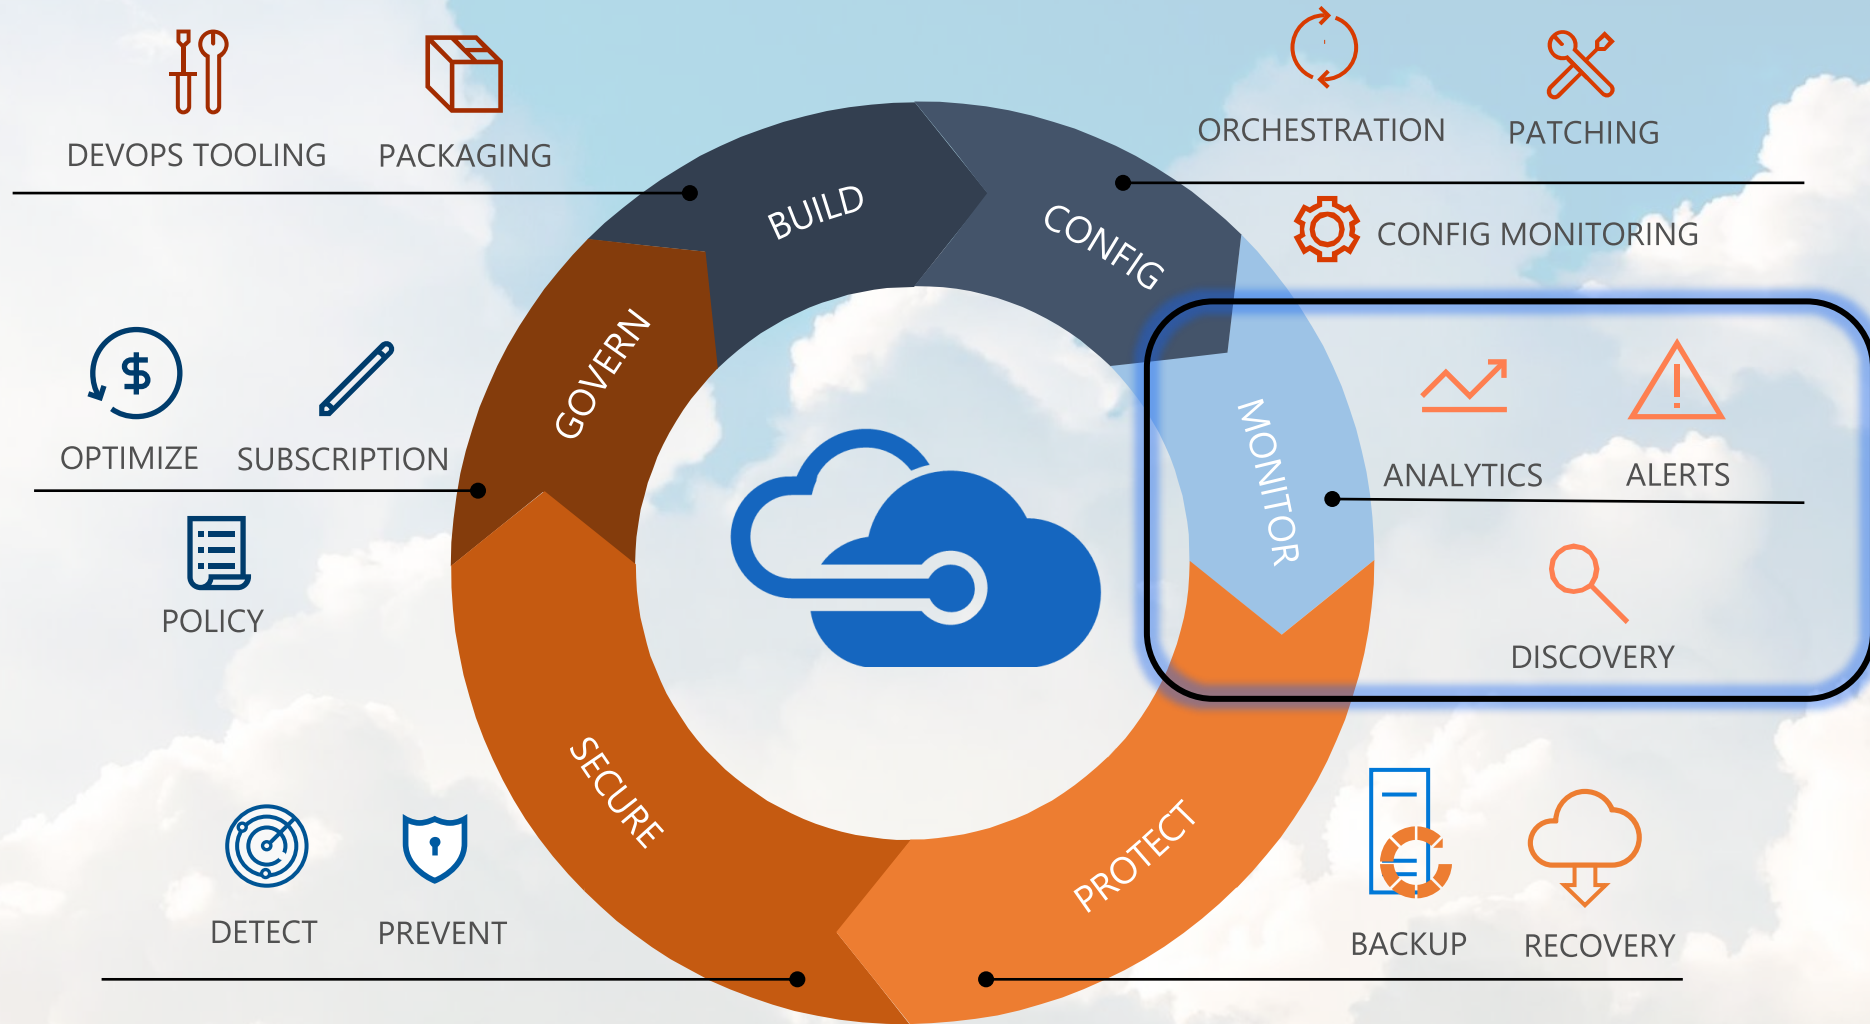

# Continuous Monitoring in your DevOps Lifecycle

---

# Modern Cloud Management

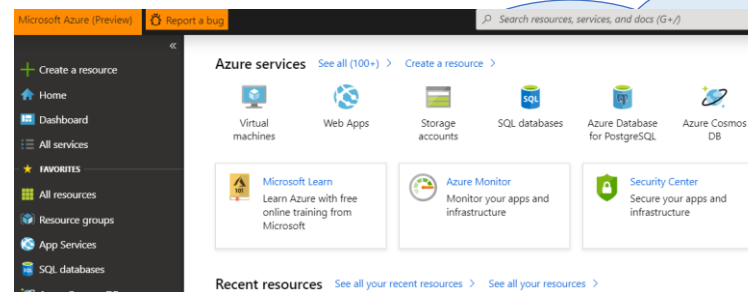

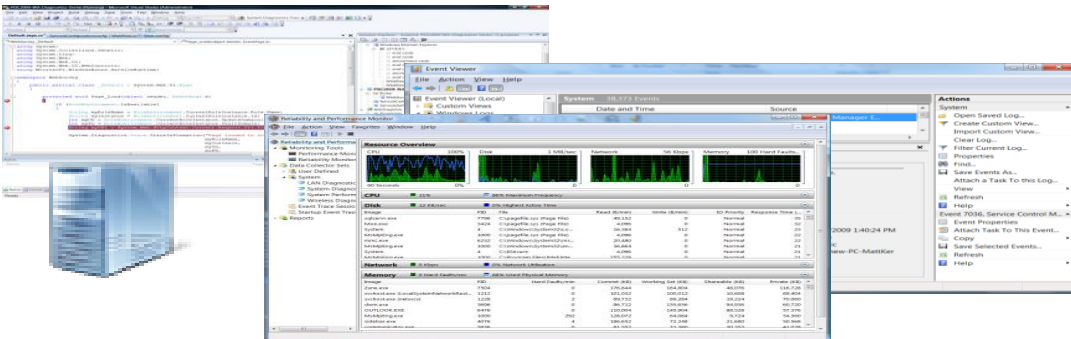

# Monitoring and Diagnostics Comparison

## On-Premises

- Static environment
  - Single, well-known instance
  - Traceable, local transactions
- Local access is feasible
  - Connect through a single Terminal Services session
  - Co-located data and tools
  - In-place changes

## Cloud

- Dynamic environment
  - Multi-instance, elastic capacity
  - Distributed transactions
- Local access is not feasible
  - Many nodes
  - Distributed, scaled-out data
  - Service upgrades

# Monitoring and diagnostic experience

## Traditional Troubleshooting

- Customer complains app is broken
- Sys admins / DBAs log onto machine
- Manually looks at perf counters, DMVs, etc.
- Find the problem and manually fix it

## Assumptions

- You can wait for the expert to look at the issue
- You don't have too many issues to examine at once
- The system can be understood by a human (not too complicated)

## Conclusion

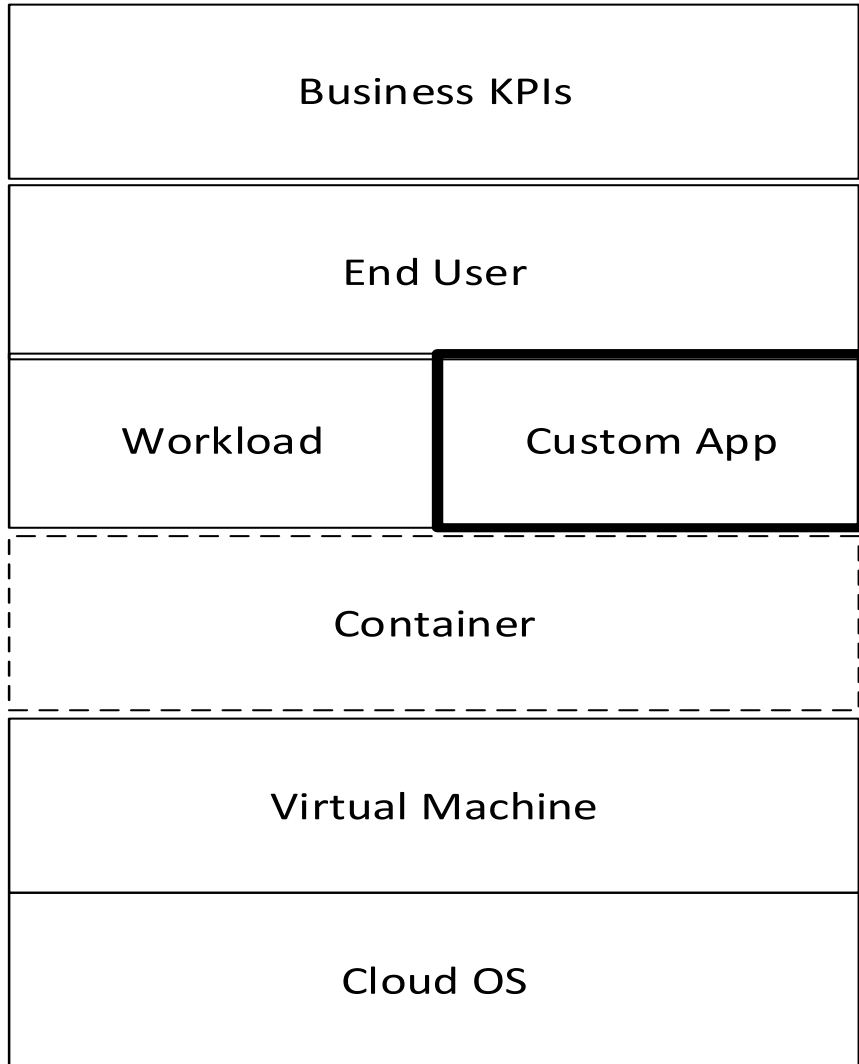

- Most of these assumptions prove false in the cloud

Module Overview

Section 2: Platform Capabilities

Lesson 1: What Azure Provides

# Bridging the Gap Between App and Infra

# Platform Capabilities

## Azure Health Check

- Azure Status
- Azure Service Health
- Azure Resource Health

## Audit

- Activity Log

## Infrastructure Monitoring Drill Down

- Service Map
- Monitor Logs

## Application Monitoring Drill Down

- Application Insights – Smart Detection
- Application Insights – Application Map
- Application Insights – Profiler
- Application Insights – Diagnostic search for instance data
- Application Insights – Metrics explorer for aggregated data
- Application Insights – Live Metrics Stream
- Application Insights – Usage Analysis & User monitoring
- Application Insights – Snapshot Debugger
- Application Insights – Custom Events

## Network Monitoring Drill Down

- Network Watcher – IP flow verify
- Network Watcher – next hop
- Network Watcher – VPN troubleshoot
- Network Watcher – Packet Capture
- Network Watcher – Connection troubleshoot
- Network Watcher – NSG flow logs
- Network Watcher – Traffic Analytics

## Take Actions

- Azure Monitor – Metrics, Autoscaling
- Alerts – SMS, Emails, Webhooks, Teams or Azure mobile App

## Recommendations

- Azure Advisor – Cost, Security, Availability & Performance

## Getting Started

- Visual Studio
- Azure Portal

Module Overview

Section 3: DevOps in Azure

Lesson 1: DevOps Integration

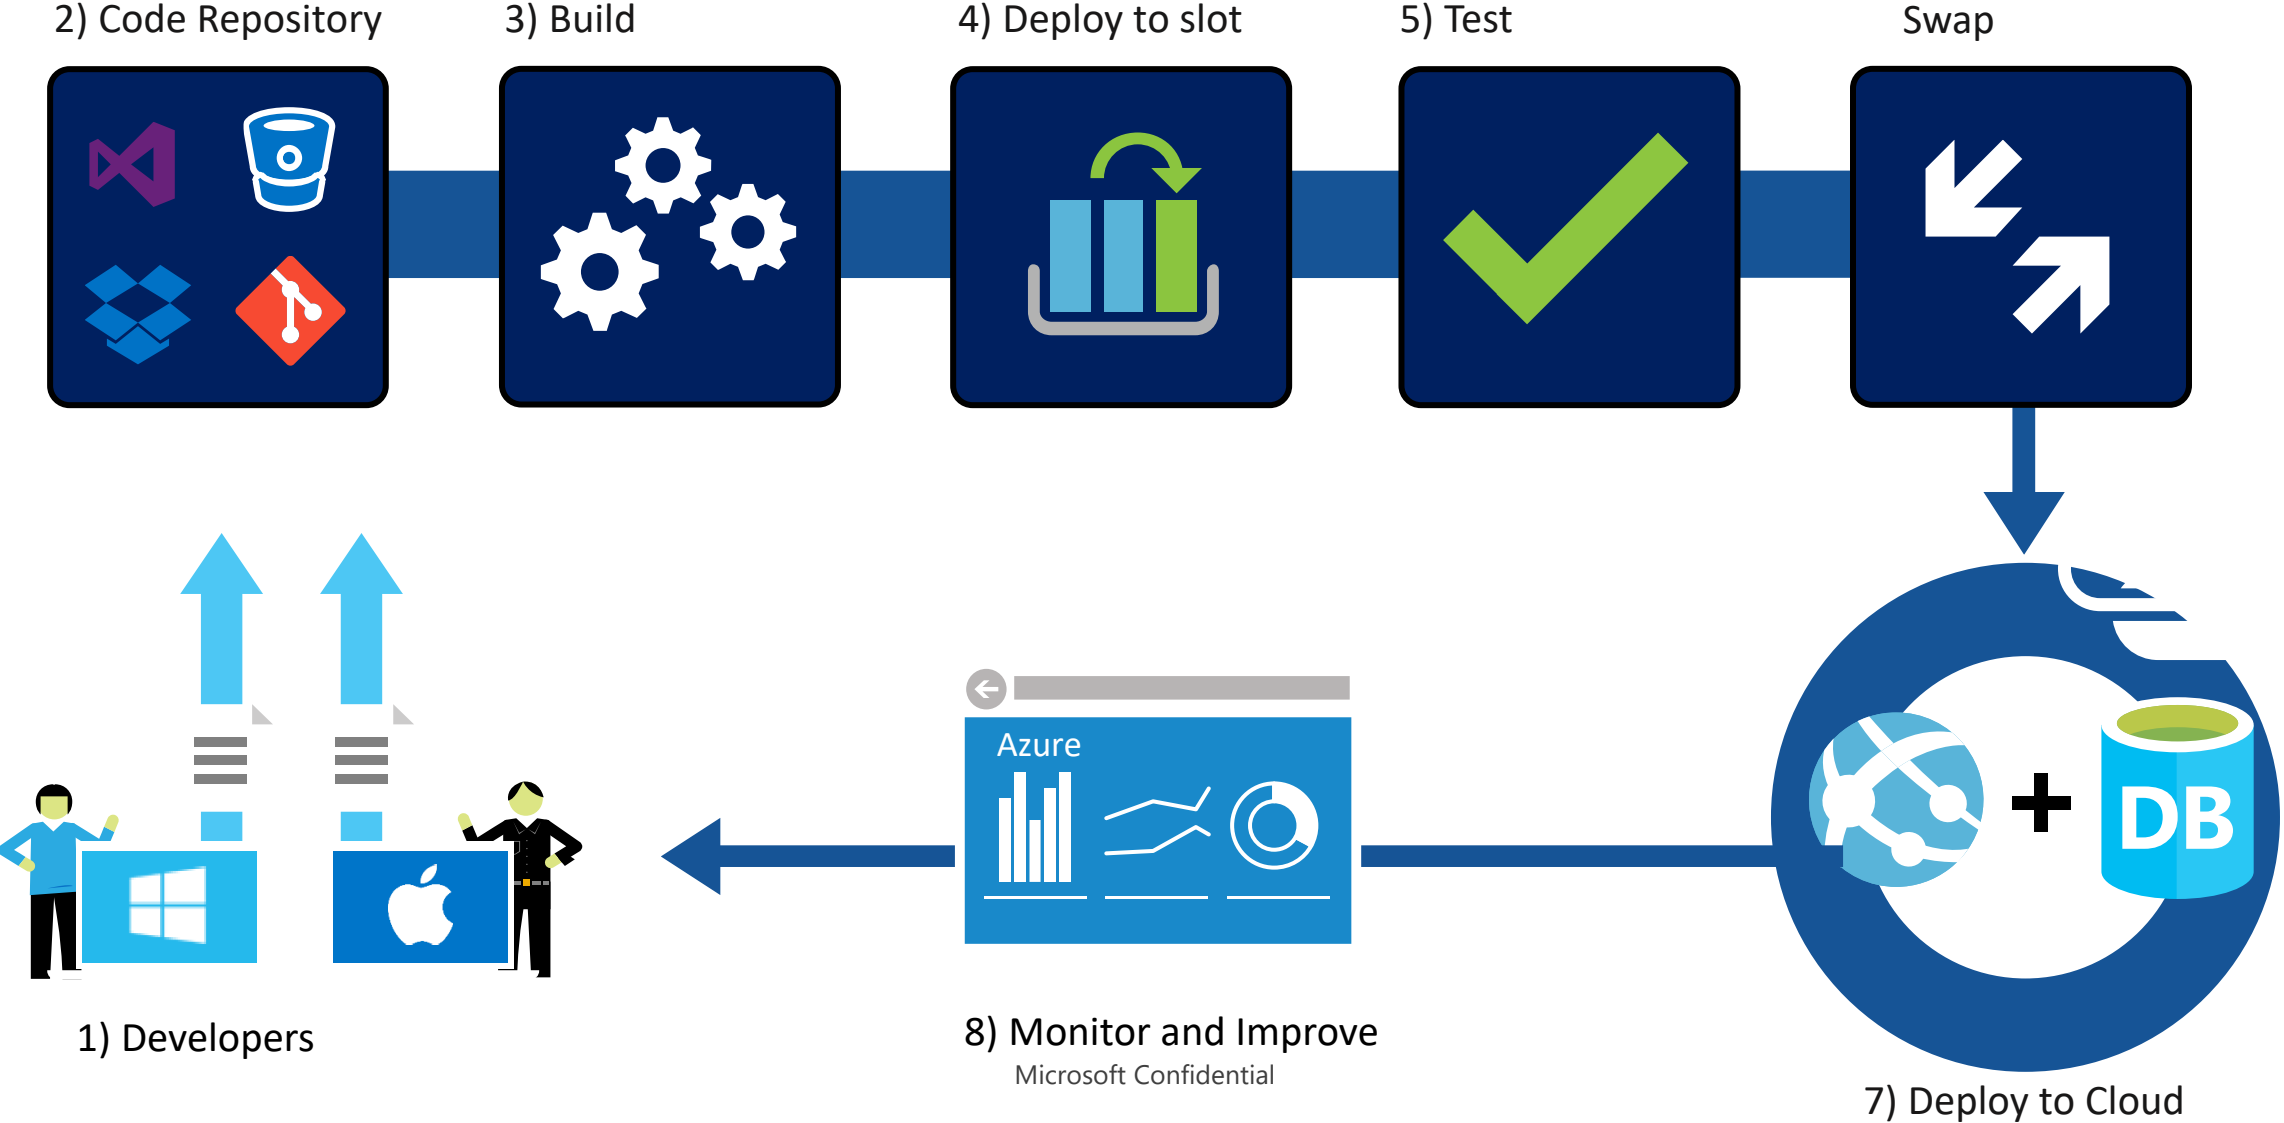

# Azure DevOps

- Full Portal Integration
- Not just for Microsoft shops

# DevOps Agility

# Review

- The Basics
- Platform Capabilities
- DevOps
